Image report

The `img` elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition.

Images with textual alternative

The following images have textual alternatives. Please review that the textual alternatives make sense considering the purpose of the image in the context of the page and that phrases like "Image of ..." are avoided.

Note that iconic images that are redundant with text next to them or purely decorative should have `alt=""` instead.

127.             <p>The Horizon games are action role-playing games played
128. from a third-person view. Players take
129. control of
130. Aloy, a hunter
131. who ventures through a post-apocalyptic land ruled by
132. robotic creatures. Aloy can kill enemies in a
133. variety of ways - setting traps such as tripwires using
134. the Tripcaster, shooting them with arrows,</p>

```

```

131.         using explosives, and a spear. Machine components,
132.         including electricity and the metal they are
133.         composed of, are vital to Aloy's survival; she can loot
134.         their remains for crafting resources. Ammo,
135.         resource satchels, pouches, quivers, resistance,
136.         antidotes, health potions, and traps can all be
137.         crafted. Weapons have modification slots for dealing more
138.         damage. Aloy wears a Focus, a small head
139.         piece that scans machines to determine their
140.         susceptibilities, identify their location, their level,
141.         and
142.         the nature of loot they will drop. Machines attack with
143.         defensive and offensive measures, and in
144.         either
145.         case
146.         react to a perceived threat by charging at it with brute
147.         force or projectiles. Exhibiting the
148.         behaviour
149.         of
150.         wild animals, some machines are inclined to move in herds,
151.         and others, with the ability to fly, do
152.         so in
153.         flocks. Unless hacked with the Override Tool, or
154.         sufficiently hit with corruption arrows, machines
155.         do
156.         not
157.         exert aggressive force against each other. Aloy also
158.         engages in battle with human enemies, such as
159.         bandits and the Eclipse cult.

172.         in
173.         the 31st century. Humans live in scattered, primitive
174.         tribes with varying levels of technological

176.         are remembered as the "Old Ones". Large

188.         four tribes that are prominently featured: the Nora, the

193.         are
194.         desert-dwelling city builders who worship the Sun. The
195.         Banuk consists of wandering clans made up of
196.         hunters
197.         and shamans who live in snowy mountains and worship the
